Phononic Vibes completed funding of €2.3M from EUREKA! Venture SGR

Manufacturing

 [Luxembourg](#) Investments 08 October 2020  

[Phononic Vibes](#), a Milan, Italy-based company developing a piece of technology for vibration and noise isolation and control, announced the completion of a capital round of €2.3M (\$2.7M).

The money was raised from Italian investors led by Eureka! Fund I – Technology Transfer – fund managed by [EUREKA! Venture SGR](#), which joined existing investors Poli360 and [Pantecnica SpA](#).

Proceeds will be used for product development, to expand the client portfolio and hire more to the 11 people team.

Phononic Vibes, founded in 2018 as a Politecnico di Milano spin-off by a group of researchers led by CEO Luca D'Alessandro, develops and markets solutions to protect against noise and vibration allowing cost reduction and performance increase compared to traditional solutions commonly used in the market for acoustic and vibration treatment.

Prior to this round, Phononic Vibes raised €500K in a seed funding in January 2019 backed by Poli360, a fund dedicated to technology transfer managed by 360 Capital, and Pantecnica Spa, an Italian company focused on products and systems for vibration insulation and mitigation.
